OHIO COVID-19 | COUNTY CASE RATES

STATIC DASHBOARD

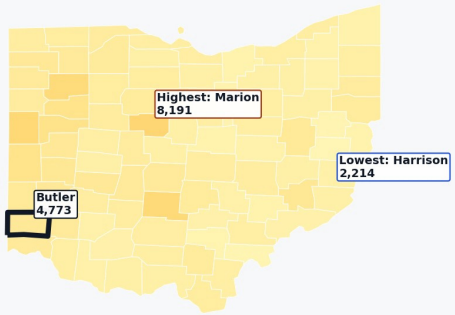

Cases per 100,000 residents • March 2020–December 2022

WEEKLY NEW CASES / 100K · 3-WEEK AVERAGE

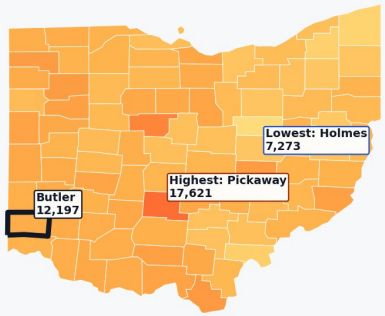

December 05, 2020

A major winter wave

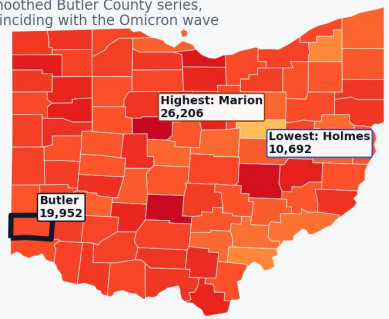

September 18, 2021

The Delta-era wave

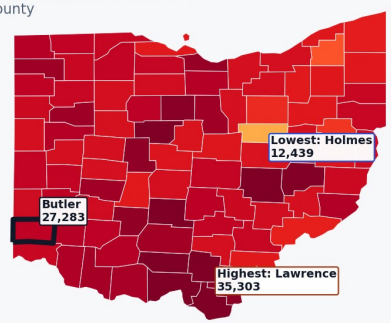

January 15, 2022

The largest peak in the initial smoothed Butler County series, coinciding with the Omicron wave

August 27, 2022

A later summer wave in Butler County

Low-density counties (bottom quartile): Adams, Carroll, Coshocton, Fayette, Gallia, Guernsey, Hardin, Harrison, Henry, Highland, Hocking, Jackson, Meigs, Monroe, Morgan, Noble, Paulding, Pike, Putnam, Van Wert, Vinton, Wyandot

High-density counties (top quartile): Clark, Clermont, Cuyahoga, Delaware, Erie, Fairfield, Franklin, Greene, Hamilton, Lake, Lorain, Lucas, Mahoning, Medina, Miami, Montgomery, Portage, Stark, Summit, Trumbull, Warren

Density cutoffs: low ≤ 83 and high ≥ 257 people/mi². Butler County is shown separately; group rates pool cases and population.

Weekly cases = change in cumulative reports; negative reporting revisions are clipped to zero. Recorded cases do not equal all infections.
